

WATCHES made throughout, and
Old Ones repaired in the best manner.

THE Subscriber wishes to acquaint the public that he has taken a shop in this city, a few rods north of the State-house, and directly opposite Mr. Joseph Pratt's tavern; where he proposes to carry on the business of Making and Repairing Watches, and he thinks he may be indulged to say in the best manner, as he has had the advantage of having served a regular apprenticeship with that well known workman, Mr. Thomas Harland of Norwich; and as he is determined that his utmost exertions and care shall not be wanting to give the greatest satisfaction to his customers, both as to the price as well as the quality of his work.—Every person who brings a watch to be repaired, may be informed what the expence of the job will be in the first instance, if desired; and if the watch should not perform to the satisfaction of the party, he will investigate the cause and make it perform if possible, gratis. He likewise finds it convenient to carry on other branches, viz. Chime Clocks, and common eight-day and thirty-hour Clocks, Surveyors Compasses, Cans, Pepper Casters, Cream Jugs, Sugar Tongs, Spoons, Buckles, and all kinds of Gold Smith's and Jewelry work.

DAVID GREENLEAF.

Hartford, Oct. 17, 1788.
